

Gastric Band

About The Procedure

If you cannot lose weight through diet and exercise, or you have serious health problems caused by obesity, then surgery may be the right treatment. There are different types of weight loss surgery designed to limit the amount of food you can take in. Some types of surgery also affect how you digest food and absorb nutrients. Many people who have the surgery lose weight quickly. If they follow diet and exercise recommendations, they may be able to keep most of the weight off. You may need long-term medical follow-up and nutritional counseling.

When considering surgery, it is important to know what you are paying for. For example, does the cost you are being quoted include all of the items on the list to the right? Do you know that the surgeon who will carry out your surgery and post-operative care has the skill and experience to deliver quality?

Allevion offers a gastric banding package that takes into account the experience and focus of the surgeon. Our quality-driven package is designed to increase the likelihood of terrific outcomes. Our surgeons specialize in weight loss surgery and have done thousands of these procedures.

Every Package Includes:
