

Gastric Sleeve Surgery

A bariatric surgery package designed to help you lose weight that features a clear cost, dietician consultation, and facility stay.

About The Procedure

If you cannot lose weight through diet and exercise, or you have serious health problems caused by obesity, then surgery may be the right treatment. There are different types of bariatric weight loss surgery designed to limit the amount of food you can take in. Some types of surgery also affect how you digest food, vitamins, and nutrition. Many people who have the surgery lose weight quickly. If they follow recommendations for diet and exercise, they may be able to keep most of the weight off.

When considering surgery, you need to know what you are paying for. Does the cost you are being quoted include all of the items on the list to the right? It is also important to know who will actually do your surgery. Do you know that the surgeon who will carry out your surgery has the skill and experience to deliver quality?

Allevion offers a sleeve gastrectomy surgery package that takes into account the experience and focus of the surgeon. Our surgeons specialize in weight loss surgery and have done thousands of procedures. A few have developed the techniques that are in general use. All have all been highly qualified for technical skill and commitment to customer service. They bring you real advantages.
