

Spermatic cord microdenervation

an outpatient microsurgical package to relieve chronic scrotal pain.

About The Procedure

Many men suffer from chronic pain in the spermatic cord, scrotum, testicle, and/or epididymis. This may result from hernia surgery, vasectomy, testicular torsion, epididymitis, trauma, and other causes. In many cases, the pain can be managed with scrotal support, medications, and other conservative measures. If these measures are insufficient, then the right solution may be a surgical cord denervation done with a powerful operating microscope.

When considering a spermatic cord denervation, it is important to know that the surgeon who will carry out your surgery has the experience and focus to deliver the quality you want. It is also important to know what you are paying for.

Allevion offers a comprehensive scrotal denervation surgery package that takes into account the experience and focus of the surgeon. Our surgeons are superbly trained. All specialize in scrotal denervation and are absolutely committed to service.

Every Package Includes:

Every surgery package includes:

- Your surgeon
- Surgeon assistant
- Anesthesiologist
- Operating microscope
- Nerve wrap, if needed
