About The Procedure

Many people suffer from colds that last for weeks, headaches, excessive sneezing, poor sleep and other sinus symptoms. If you have sinus symptoms, you may find relief with nasal irrigations, antibiotics, and other treatment. If you cannot find relief with first-line treatments, surgery may be an effective option for you.

When considering surgery, it is important to know what you are paying for. For example, does the cost you are being quoted include all of the items on the list to the right? Do you know that the surgeon who will carry out your surgery has the experience and focus to deliver the quality you want?
